## No Justice, No Peace.

On April 17, retired Judge Herbert Donaldson dismissed felony charges against Ruben Espinoza, the driver who murdered cyclist Chris Robertson on November 17, 2000. The Judge claimed there was insufficient evidence to support a charge of gross negligence. This, despite the fact that Espinoza, by his own admission, stated that he was playing a game of "chicken" with the cyclists that night. Angry? You should be.

What is the message sent by this judge? That in San Francisco, with your car, you can run over and kill people with impunity - even if it is intentional!

Now are you angry? YOU SHOULD BE!!

Let the city know that this slaughter on our streets will not be tolerated. Murder is no accident!

Tell your friends, family, coworkers, neighbors (heck, tell strangers on the street) to join us at April Critical Mass to take the city streets back.
